

IPO/OSB/M-121-66  
9 March 1966

MEMORANDUM FOR: Assistant for Plans and Development, NPIC

ATTENTION :   
SUBJECT : Requirement for  High Power Steroscope (Twin  
Dynazoom) Modification  
REFERENCE : Speed Letter Dated 1 March 1966

1. The Photographic Analysis Group presently has four (4) of the subject instruments that will require modification. In addition, twenty-nine are on requisition with delivery expected in the near future for a total of thirty-three (33) instruments requiring modification.

2. PAG was not aware of the fact that the  Dynazoom had to be modified for use with the Goniometer. If this is the case however, then it will also be necessary to have our Chip Comparator heads modified to accommodate the Goniometer eyepieces. At present we have 2 chip comparators. This number should be added to the total of thirty-three (33) stated in item 1.

3. Future requirements are forty-five (45) Twin Dynazooms and two (2) Chip Comparators in 1968. Further estimates cannot be given at this time.

4. Your cooperation in this matter is appreciated.

Assistant for Photographic Analysis, NPIC
